PREDIXON

PREDIXON AC WALL BOX

Compact, Tethered AC Charging for Everyday Use

22 kW AC, 3-phase	Tethered Type 2	RFID card	420 × 370 mm

Overview

A compact wall-mounted AC charger with a tethered cable and a simple status display — built for straightforward, everyday charging at home, at work and in depots. It shares its body design with the DC Wall Box, so AC and DC points look the same on site.

Key Features

- Tethered cable: Integrated Type 2 cable with holster — no loose cable to carry.
- Status display: Readiness and charging progress at a glance.
- RFID card activation: Keeps shared chargers under control.
- Family design: Same look as the DC Wall Box for mixed AC/DC sites.
- Built safe: To international EV-charging safety standards.

Technical Specifications

Charger Type	AC wall box, Mode 3
Output	Up to 22 kW (3-phase, 32 A)
